

Part of the award winning Satinjet™ range, Tahi delivers a powerful performance while saving on the precious resources of water and energy.

Tahi has been designed with the user in mind. It's a sophisticated shower that makes a bold statement in the most contemporary of bathrooms. Tahi features a foot rest that's perfect for shaving legs, an extra large, practical storage shelf, and Satinjet™ technology integrated into both the drencher and the handset.

Satinjet™ technology utilises twin-jets of water that are directed to collide and disperse into thousands of droplets per second creating a soft, wide and drenching spray, eliminating the needle-like effect of a conventional shower spray. Tahi's drencher is optimised to 14 litres per minute, whilst the handset delivers only 9.5 litres per minute, using less water than a conventional shower, and saving on water and energy with every shower taken.

Tahi saves on water and energy, yet delivers the ultimate stylish, blissful shower experience.
